

Aberdeen Central High School

Aberdeen, SD

The two-story academic area of the school is arranged in four “houses”. These flexible, multi-disciplinary “houses” combined with the remaining academic areas of the building, are accessed from a main circulation spine. Lockers and small socialization spaces are also located along the main circulation. The building serves 1,200 students with general-purpose classrooms, science labs, resource rooms for special needs, small group study rooms, and teacher planning centers. Each cluster can support a number of different academic configurations.
