

Faulk County Jail and Sheriff's Office

Faulkton, SD

This project includes a 35-bed jail, in a popular layout, sheriff's administration and dispatch/communications. The single-story structure includes: precast and steel structure with bar joist, steel wall panel cells, security electronics, single-ply membrane low-slope roof with internal roof drains and reuse of existing geothermal heat pump system with supplemental heat. That facility will be backed up by emergency diesel generator. The project also includes a basement under a portion of the Administrative section.
